Architecture Infrastructure
EITC

Dr. Sherif is the Head of the Infrastructure Strategy & Architecture at the Emirates Integrated Telecommunications Company (du). He is a leading expert with more than 20 years of international experience in the strategy, design, development and implementation of next generation networks technologies and related infrastructure. He received his Ph.D. degree in Electrical Engineering from the City University of New York, USA. From 1997 to 2008, he was working in the Wireless Business Unit at Lucent Technologies (which became Alcatel-Lucent in 2007), in Whippany, New Jersey, USA. In 2008, he moved to Dubai in the United Arab Emirates to join the Emirates Integrated Telecommunications Co. "du" where he has held several positions including the head of the Mobile Network Planning and has recently resumed the responsibility of being the Head of the Infrastructure Strategy & Architecture. He has published several related papers in various Technical Journals as well as multiple international conferences. He has multiple contributions to the 3GPP and other Telecommunications standards. He also has multiple granted patents in the USA. In 2015, Dr. Sherif co-authored a book titled "Design, Deployment, and Performance of 4G-LTE Networks:

Mr. Lars Nielsen
CEO
Global Certification Forum (GCF)

Since 2013, Lars is responsible for expanding the global reach of the GCF certification scheme to cover India, the Middle East and Latin America and its diversification into developing industries such as the IoT. Prior to joining GCF, Lars worked at Motorola for nearly 30 years, where he gained in-depth experience in development, testing, quality and compliance of mobile devices, as well as the management of international regulatory and policy issues. During his time at Motorola, Lars chaired the Mobile Terminals Working Group of DIGITALEUROPE and was instrumental in establishing the MoU on a common mobile charger solution in the EU. Active across the mobile industry, Lars has participated in working groups for bodies as diverse as the ITU-T, ETSI, CENELEC and PTCRB, as well as serving as an official Bluetooth Qualification Expert. Lars is a well-known and respected figure within the mobile industry, having actively participated in the work of the GCF since the organization was founded in 1999. He served as the Motorola delegate on the Board of Directors when GCF was incorporated in 2008.

Mr. Chris Hogg
Programme Manager
Global Certification Forum (GCF)

As GCF Programme Manager, Chris advises on the operational and strategic development of GCF's Certification Programme working with GCF's members and partner organizations to define and maintain GCF's Certification Criteria. He also advises on how to identify and deal with changes in the market that impact the demand for GCF Certified devices.

Prior to GCF, Chris was a standards manager in Nortel actively negotiating standards for IMS and VoLTE in a wide range of international groups including ITU-T, ETSI and 3GPP.

Chris runs his own consultancy – Kensington Communication Consultants – advising clients in the mobile and IoT industry. As a member of Dot Matrix Group Investment Syndicate he regularly reviews UK tech start-up business plans and questions Boards on their strategic priorities.

Chris holds an MBA from Imperial College, London (2014) and he is a Professional Engineer (UK CEng) with a Masters degree in Electronics and Electrical Engineering from University of Strathclyde (2000).
