The 'Quality Mark' for IoT in the connected world with oneM2M solutions

A certification programme for oneM2M - standards for M2M and the IoT

Internet of everything is here, and with it comes, bringing with it a need for **proper functionality** and **compliance** to industry standards for fast, efficient and secure IoT solutions. Mobile technologies that comply with oneM2M standards will ensure **seamless connectivity** and **interoperability** with back end networks, as well as allowing for safe and secure transactions.

GCF oneM2M certification sets a **benchmark for quality** - enabling **successful and reliable** IoT connectivity.

Who should consider GCF oneM2M certification?

Businesses offering solutions in telematics and intelligent transportation, healthcare, utilities, and industrial automation. Smart homes using oneM2M standards for the applications layer can benefit from GCF oneM2M certification by improved productivity, reduced costs and ensuring the sustained growth of the IoT market.

Who are we?

Who are we? GCF is the mobile industry's certification mark for mobile products

- 300+ member firms worldwide
- Major brands participate
- 65 companies certified products in 2018
- Global test eco-system
